

ACKNOWLEDGEMENTS

This book could serve for academic reference as it is based on system analysis and operational research. However it is most of all the attainment of a personal experience in the health sector impacted by unavoidable interactions with the world of politics and literature. I am grateful to those colleagues and friends with diversified backgrounds from different sectors with whom work and discussions have enriched this book.

My thoughts go particularly to Minister M.J. Khalifeh for his support in the development of the information system, and his precious contribution in enhancing the culture of evidence based performance assessment within the Ministry of Public Health and Governmental Hospitals. I also express my gratitude to WHO-EMRO and Beirut Office for their encouragement and financial support in producing this book.

I would like to thank Ms. Hilda Harb for her technical assistance, Mrs. Haifa Kanaan for her administrative help and Dr. Salim Adib for the editing work and valuable comments he has provided.

Finally, special thoughts go to my family, my children Joumana, Zeina and Tarek for their understanding and love and my wife May for her dedication and moral support without which this book would not have been completed.
