Dear Customer,

Please find attached details of a voluntary Field Safety Corrective Action that has been initiated by Stryker Trauma GmbH, Division Trauma and Extremities for sterile packaging of Guide Wire(s), K-Wire(s) and Intramedullary Pin Metaizeau. It was found through review of packaging that the seal integrity of the pouch may be decreased. Stryker Trauma GmbH, Division Trauma and Extremities is recalling all unconsumed, non-expired lots of above listed article numbers. Given high turnover for this product and the frequency with which it had been on backorder it is not expected that a significant quantity of units subject to this notice remain in the field. No injury or harm has been reported for this event.

Packaging example – sterile pouch inside (plastic) clear tube

Example of sterile pouch with potentially non-conforming seal

### Potential Hazards

A potential capillary defect in the sealing could potentially lead to unsterile product.

### Mitigating Factors

The secondary packaging is a (plastic) clear tube with silicone caps at both ends. While not validated as a sterile barrier, it does provide additional protection to the enclosed pouch package configuration. Furthermore, it should also be noted that it is standard practice for surgeons to prescribe antibiotics peri-operatively in order to reduce the risk of potential infection, especially in situations where the injury was caused due to excessive trauma.
