Dear Customer,

**Details of affected devices**

Teleflex has initiated a voluntary Field Safety Corrective Action (FSCA) for the above listed products; please refer to Appendix 2 for a list of impacted product codes and lot numbers. This recall is an expansion to a recent recall (Teleflex reference EIF-000464). The expansion is necessary to include additional lots and product codes based on the outcome of further investigation.

If you did not receive a copy of the recall letter for EIF-000464, it is because we have identified that you had only received products from the expanded scope of products involved in EIF-000479, and did not receive any affected lots included in the EIF-000464 recall scope. Regardless, if you had originally responded to the initial notification (EIF-000464), or are just receiving notification for the first time, Teleflex requests that you complete and sign the attached response form confirming that you had been notified of this action and took the required action.

**Description of the problem & immediate actions required**

Teleflex is initiating a Field Safety Corrective Action due to reports that the endotracheal tube cuff could be inflated while the pilot balloon remained flat. In the event of the pilot balloon remaining flat, there is the potential risk of injury to the patient as the pilot balloon no longer reflects the condition of the cuff. The risk persists in situ, therefore clinicians should evaluate the risk benefit to individual patients of extubation and reintubation.

Our records indicate you have received products that are subject to this FSCA.

Depending on your device location please adhere to the following Action list:

Device location	Action List Number
Medical facilities (hospitals, medical staff, etc.)	<b>1</b>
