2. Presentation of the online mapping platform for the 4Ws

Discussion	Action / Decision / Suggestion
1. Updates and discussions of challenges and issues related to MHPSS service provision	
<ul style="list-style-type: none"> ➤ No new emerging challenges or issues have been faced since last month by actors participating. 	
2. Presentation of the online mapping platform for the 4Ws	
<ul style="list-style-type: none"> ➤ The online mapping platform for the 4Ws (Who is doing What, Where and until When) in MHPSS was presented ahead of its launching in the beginning of September. ➤ Focal persons who will be responsible of entering data for their respective organisations participated in the meeting where a simulation of data entry was presented. ➤ Feedback that was provided for consideration included: <ul style="list-style-type: none"> ➤ The “target” in the beneficiaries section is confusing because it can mean either the whole expected target of the year or the actual number of persons reached. It was suggested that this point to be dissected into target for activity and actual number of persons reached. It was emphasized that is very important to have reporting on the target group nationality, gender and age to facilitate referrals, but also if any particular vulnerability is targeted. ➤ It was noted about the possibility of adding an option to report on the fees required by nationality for the service in question. 	<ul style="list-style-type: none"> ➤ The online mapping platform will be launched beginning of September. ➤ In preparation, all organisations will be asked as of now to create their user accounts on the platform. A link will be shared by email to proceed with this. Once the user account is created by the organisation, it will be reviewed and approved centrally on the system at the MOPH level and then activated.
